

## ***Health Professionals Comment on Colloidal Silver***

**Dr. Robert O. Becker, M.D.** "What we have actually done was rediscover the fact that silver kills bacteria, which had been known for centuries. When antibiotics were discovered, clinical uses for silver as an antibiotic were discarded." Concludes Dr. Robert O. Becker. Extensive research into the curative properties of silver has been conducted for many years at the Upstate Medical Center, Syracuse University, Syracuse, N.Y. under the direction of above mentioned Dr. Becker. The experiments conclude that silver works on a wide range of bacteria, without any known side-effects or damage to the cells of the body. Silver was doing something more than killing disease-causing organisms. It was also causing major growth stimulation of injured tissues. Dr. Becker concludes that the presence of the silver ion may help to regenerate tissue, eliminate old or cancerous cells, and any other diseased or abnormal condition. \*\*

**Dr. Henry Crooks** (Use of Colloids in Health-Disease) found that silver in the colloidal state is highly germicidal, quite harmless to humans and absolutely nontoxic. From his bacteriological experiments with silver he concluded, "I know of no microbe that is not killed in laboratory experiments in six minutes."

**Dr. Richard L. Davies** Executive director of the Silver Institute, which monitors silver technology in 37 countries, reports: "In four years we've described 87 important new medical uses for silver. We're just beginning to see to what extent silver can relieve suffering."

**Dr. Gary Smith** "When silver was present, the cancer cell dedifferentiated and the body was restored."

**Dr. Bjorn Nordenstrom** Of the Karolinska Institute, Sweden, has successfully used silver as a component in his cancer treatments for many years. \*\*

**Dr. Leonard Keene Hirschberg, A. M., M. D.** (John Hopkins) states, "Speaking generally, the colloidal metals are especially remarkable for their beneficial action in ineffective states." \*\*

**J.A. Spadaro, Ph. D** "...studies showed the spectrum of organisms susceptible to electrically generated silver ions was wide and...compared favorably with...other antibiotics." \*\*

**U.C.L.A. Medical Center** "It killed not only the HIV virus, but every virus that was tested in the lab."

**Canty & Baranowski** "Colloidal Silver will prove to be one of the greatest discoveries in preventative, natural health care of all time." \*\*

**The University Medical Center**, Geneva, Switzerland, conducted a study on December 30, 1992 which concluded that silver terminated all viruses as well as bacteria, by suffocation.

**Science Digest March 1978** "A 65-year-old diabetic cut himself on the leg. He washed and bandaged it but, as often happens with diabetes, the pain persisted, and the cut grew into a sore. Soon it became bigger than the bandage, and he had to apply a dressing. Still, it grew bigger and ugly. In desperation he went to a clinic. His sore was diagnosed as a 'stasis ulcer.' For a year, one treatment after another was tried. Nothing, including penicillin and sulfonamide, could heal the ulcer. If his condition had continued unchecked, his leg probably would have been amputated. But finally he was referred to a clinic that treated skin ulcers with a silver compound. This promptly stopped the growth of all bacteria. In less than two months, the ulcer was completely healed."

**Dr. Evan M., Kansas** "We have had instant success with Colloidal Silver and immune compromised patients. A few examples are: Pink eye (topical) totally resolved in less than six hours; recurrent sinus infections (oral ingestion) resolved in eight days; acute cuticle infections - (topical) - twenty four hours. Another major area in which we have improved our clinical results is in the area of bowel detoxification and dysbiosis. Colloidal Silver has proved excellent in the removal of abnormal intestinal bacteria; also it has proved to be a great adjunct to our Candida albicans, Epstein Barr Virus and Chronic Fatigue Syndrome protocols."

**NIH, Utah Research Center** "We have discovered that Colloidal Silver is effective against almost every germ in this center. For safety of lab personnel, we routinely use Colloidal Silver to scrubdown and neutralize all of our labs, some of which are our most toxic and contaminated projects"

Individual testimonies are based on the experiences of each person and results will vary. Colloidal Silver is not a smart weapon in that it cannot always reach the intended target and may not be effective in all situations.*
